

IMPLEMENTING POLICY AND GUIDELINES ON THE FACULTY AND PROGRAM CHAIR PERFORMANCE EVALUATION SYSTEM (PES)

I. RATIONALE

The **Faculty and Program Chair Performance Evaluation System (PES)** of Gordon College is hereby **institutionalized** beginning **Academic Year 2025–2026** as part of the College's commitment to continuous quality assurance, academic accountability, and professional excellence.

This system operationalizes the college's thrust to uphold standards of effective teaching, leadership, and service consistent with Gordon College's mission to provide transformative, inclusive, and learner-centered education. The PES serves as both a **developmental** and **accountability** mechanism — designed not merely to measure performance but to foster a **culture of reflection, improvement, and recognition** among faculty and academic leaders.

Specifically, this implementing policy aims to:

1. Establish **clear, evidence-based standards** for evaluating faculty and program chairs across academic units;
2. Ensure **fair, consistent, and transparent evaluation processes** that integrate feedback from multiple sources such as students, peers, program chairs, deans, and self-assessments;
3. Strengthen **instructional quality and leadership capacity** by identifying areas of strength and those needing targeted professional development;
4. Align individual faculty and program chair performance with the **strategic goals of the institution**, particularly on student learning outcomes, collegial collaboration, and continuous improvement of instruction and programs;
5. Provide **data-driven bases** for decision-making on retention, promotion, and recognition of meritorious performance; and
6. Institutionalize **regular feedback mechanisms** that support mentoring, coaching, and academic innovation.

The PES introduces standardized forms, rating tools, and evaluation rubrics to ensure inter-college consistency and reliability of results. These tools also reflect a balanced evaluation approach, combining quantitative ratings and qualitative observations to provide a comprehensive picture of performance.

Furthermore, the policy prescribes a **phased implementation** beginning in the First Semester of AY 2025–2026 to allow for a pilot cycle, calibration, and refinement of procedures. The system shall then move toward **full implementation by the Second**

Semester of the same academic year, incorporating two classroom observations and a strengthened peer evaluation process.

This policy supersedes all previous and inconsistent performance evaluation practices and mandates all colleges to comply with the prescribed forms and procedures issued by the Office of the Vice President for Academic Affairs through the Instruction Unit.

II. COVERAGE

This policy applies to **all full-time and part-time teaching faculty** and **Program Chairs** across all colleges of Gordon College.

This section expands and explains each evaluation component while keeping the formal institutional tone and structure consistent with Gordon College's official communications.

III. THE FACULTY PERFORMANCE EVALUATION SYSTEM (FPES)

The **Faculty Performance Evaluation System** serves as a comprehensive framework for assessing the professional effectiveness, instructional quality, and contribution of each faculty member to the College's academic mission. It adopts a **multi-source evaluation model** to ensure a balanced, fair, and developmental appraisal of performance.

The evaluation covers the following components and weight distribution as follows:

Evaluation Component (Full-Time Faculty)	Weight
1. Student Evaluation	40%
2. Dean/Assistant Dean Evaluation	20%
3. Program Chair Evaluation	15%
4. Classroom Observation	15%
5. Peer Evaluation	5%
6. Self-Evaluation	5%
Total	100% + Meritorious Accomplishments (if any)
Evaluation Component (Part-Time Faculty)	Weight
1. Student Evaluation	80%
2. Dean/Assistant Dean Evaluation	20%
Total	100% + Meritorious Accomplishments (if any)

A. Student Evaluation (40%)

This component reflects the students' perception of the faculty member's teaching effectiveness, classroom management, communication, and professional conduct. It gauges how well the instructor facilitates learning, maintains engagement, provides feedback, and models professionalism. The student evaluation results serve as a direct measure of learner satisfaction and are administered through the official **Student Evaluation Form** via GCLamp.

The results are used not as punitive measures but as formative inputs to help faculty members identify areas for improvement in pedagogy and classroom climate.

B. Dean/Assistant Dean Evaluation (20%)

The Dean or Assistant Dean provides an administrative perspective on the faculty member's professional behavior, instructional reliability, collegiality, and adherence to institutional policies. Using the **Faculty Performance Evaluation Form for Conduct of Profession**, this evaluation considers punctuality, submission of requirements, compliance with academic standards, and participation in college or institutional activities.

This component ensures that faculty performance aligns with institutional expectations and reflects accountability to the academic unit's operational goals.

C. Program Chair Evaluation (15%)

The Program Chair's evaluation assesses the faculty's **academic performance and professional conduct**, focusing on instructional planning, assessment practices, mentoring, and contribution to program outcomes. This component emphasizes the faculty's collaboration within the department, responsiveness to feedback, and consistency in achieving course outcomes.

The Program Chair plays a key role as both evaluator and mentor, ensuring that the evaluation results guide instructional and professional growth.

D. Classroom Observation (15%)

This component directly measures the faculty's actual teaching competence through scheduled classroom observations using the **Summary of Classroom Observation Ratings Form**. It assesses the faculty's ability to plan lessons effectively, deliver content clearly, manage learning environments, and apply varied instructional strategies.

Implementation Schedule:

- **First Semester AY 2025–2026 (Pilot):** One (1) scheduled and announced classroom observation.
- **Starting Second Semester AY 2025–2026:** Two (2) required classroom observations:
 - One (1) scheduled/announced (preferably during midterms); and

- One (1) walkthrough/unannounced (preferably during final term).

The combination of announced and unannounced observations ensures both preparedness and authentic assessment of teaching practice.

E. Peer Evaluation (5%)

This component encourages collegial accountability and professional growth by allowing faculty members to evaluate each other's teaching practices and conduct. Each faculty member shall be rated by **two peers**:

- **One chosen by the faculty member**, and
- **One assigned by the Program Chair**.

The Program Chair shall **average the two peer ratings** to determine the final peer evaluation score using the **Summary of Peer Evaluation Form**.

Peer evaluation promotes reflective practice, collaboration, and exchange of effective teaching techniques among colleagues.

F. Self-Evaluation (5%)

The self-evaluation allows the faculty member to assess personal teaching effectiveness, professional responsibilities, and areas for improvement. This component promotes reflective practice and self-directed professional development, helping faculty set concrete goals for growth.

G. Meritorious Accomplishments (Add-on)

Faculty members with exceptional achievements beyond regular teaching duties may submit documentation using **Meritorious Accomplishments Form**. Recognized accomplishments include research outputs, community engagement, innovations in instruction, publication, awards, or significant contributions to institutional development.

These shall be validated and may **increase the overall performance score** as approved by the Dean and endorsed to OVPAA.

IV. THE PROGRAM CHAIR PERFORMANCE EVALUATION SYSTEM (PCPES)

The **Program Chair Performance Evaluation System** ensures that academic leadership within each college is exercised with integrity, effectiveness, and alignment to the College's academic mission and strategic priorities. It provides a comprehensive appraisal of the **Program Chair's leadership, management of faculty performance, instructional quality, and mentoring responsibilities**, reflecting the dual role of the Program Chair as both an academic leader and a teaching faculty member.

The evaluation adopts a balanced, multi-source approach, with the following components and weights:

Evaluation Component	Weight
1. Student Evaluation	30%
2. Dean/Assistant Dean Evaluation	20%
3. Faculty Evaluation (Summary of Faculty Ratings)	20%
4. Classroom Observation	20%
5. Peer Evaluation	5%
6. Self-Evaluation	5%
Total	100% + Meritorious Accomplishments (if any)

A. Student Evaluation (30%)

This component reflects the students' perception of the Program Chair's effectiveness as an instructor, mentor, and academic leader. It measures teaching performance, classroom engagement, clarity of instruction, and professional conduct as perceived by learners.

Through the **Student Evaluation Form (GCLamp)**, this component captures how well the Program Chair maintains teaching quality while balancing leadership duties. It also indicates the Chair's ability to model instructional excellence to the faculty team.

B. Dean/Assistant Dean Evaluation (20%)

This evaluation component provides the administrative perspective of the Dean or Assistant Dean on the overall performance, leadership, and professional behavior of the Program Chair.

Using the **Program Chair Performance Evaluation Form for Leadership, Mentoring, and Conduct of Profession**, this component assesses the Chair's ability to:

- Implement and monitor academic policies and programs;
- Lead and mentor faculty members;
- Manage instructional resources;
- Ensure compliance with institutional and accrediting standards; and
- Uphold professionalism and integrity in academic administration.

It represents the institutional oversight of the Program Chair's performance as a middle-level academic manager.

C. Faculty Evaluation (20%)

This component measures the Program Chair's leadership from the perspective of faculty members within the program. This evaluation reflects how the Chair demonstrates collegiality, fairness, approachability, and effectiveness in communication and faculty support.

Faculty members assess how well their Chair promotes collaboration, resolves concerns, and supports their teaching and professional growth. This component fosters a **feedback loop** that enhances leadership responsiveness and strengthens faculty–chair relationships.

D. Classroom Observation (20%)

As academic leaders, Program Chairs are expected to demonstrate exemplary teaching practice. This component assesses the Chair's actual classroom instruction using the **Classroom Observation Tool**.

The evaluation focuses on lesson design, pedagogical strategies, learner engagement, assessment methods, and integration of inclusive and innovative teaching practices.

Consistent with faculty observation protocols, the following shall apply:

- **First Semester AY 2025–2026:** One (1) scheduled and announced observation (pilot implementation);
- **Starting Second Semester AY 2025–2026:** Two (2) classroom observations — one scheduled/announced (preferably midterms) and one walkthrough/unannounced (preferably final term).

This component ensures that Program Chairs model high standards of teaching and serve as instructional leaders in their departments.

E. Peer Evaluation (5%)

This component encourages collaboration and collegial accountability among academic leaders. Each Program Chair shall be rated by **two peer Chairs**:

- **One assigned by the Dean/Assistant Dean, and**
- **One chosen by the Program Chair himself/herself.**

The peer evaluation measures leadership style, decision-making, teamwork, mentoring, and contribution to inter-program coordination. It promotes professional exchange of ideas, benchmarking of leadership practices, and recognition of exemplary performance among peers.

F. Self-Evaluation (5%)

The Program Chair reflects on personal effectiveness in leadership, teaching, communication, and management. This component encourages **critical self-assessment**

on achievements, challenges, and future goals related to instructional quality, faculty supervision, and program development.

It also supports the formulation of an **Individual Leadership Development Plan (ILDLP)** as a tool for continuous professional growth.

G. Meritorious Accomplishments (Add-on)

Program Chairs with exceptional performance or achievements may receive additional merit points using the **Meritorious Accomplishments Form**. Recognized accomplishments include successful program accreditation, research and publication, innovative academic initiatives, exemplary service, or community engagement projects that have measurable institutional impact.

Such accomplishments shall be validated by the Dean and approved by the Vice President for Academic Affairs for inclusion in the total performance score.

V. Meritorious Accomplishments

Gordon College recognizes the meritorious accomplishments of its faculty that go beyond the regular duties of teaching and institutional responsibilities. These accomplishments should align with the three core functions of higher education: Instruction, Research, and Extension/Service. The intent is to acknowledge voluntary, exceptional, or value-adding contributions that extend beyond minimum expectations.

A. Key Intent and Purpose

The intent is to acknowledge voluntary, exceptional, or value-adding contributions that extend beyond minimum expectations.

These accomplishments must align with the three core functions of higher education: Instruction, Research, and Extension/Service.

The points from this form are only added during the summative appraisal at the end of the semester.

B. Point System and Limitations

Each verified Meritorious Accomplishment item is worth 0.04 points. A faculty member can claim a maximum of 10 items, resulting in a total bonus of 0.4 points. The limited weight of 0.4 points is intentional to ensure that core teaching responsibilities remain central to faculty evaluation, promoting fairness and preventing over-accumulation from non-core activities.

C. Instructions to Claim Accomplishments

Write 0.04 in the space before the item you wish to claim. You must attach certified documentation or proof for each claimed entry.

Each accomplishment may be claimed only once. For example, a research paper that was both presented and published can only be claimed under one category (either B.2 or B.3), but not both.

Faculty should only select their top 10 distinct accomplishments.

Multiple similar entries under the same criterion (e.g., membership in several organizations) will only count as one Meritorious Accomplishment item.

Higher Degree Exception (Automatic 0.4). Completion of an MA/MS/PhD/EdD/DPA/DBA or any higher graduate degree automatically earns the faculty member the total bonus of 0.4 points. If this is claimed, the faculty member does not need to submit any other item for credit.

For the initial implementation year (2025-2026), accomplishments completed during the past three academic years (2023–2024, 2024–2025, 2025–2026) may be credited.

V. IMPLEMENTATION PROCEDURES

The implementation of the Faculty and Program Chair Performance Evaluation System (PES) shall be coordinated by the **Office of the Vice President for Academic Affairs (OVPA)** through the **Instruction Unit**, in close collaboration with Deans and Program Chairs. The following procedures and responsibilities shall guide the process every semester:

A. Evaluation Schedule

1. The **evaluation process** shall be conducted **each semester** (First Semester: August–December; Second Semester: January–May).
2. The OVPA, through the Instruction Unit, shall issue a **semester-specific timeline** that includes the schedule for classroom observations, evaluation dissemination, data collection, and submission of summary ratings.
3. Deadlines for the completion of all evaluation activities must be strictly observed to allow timely consolidation of institutional results.

B. Evaluation Administration

1. Student Evaluations shall be administered online through the GCLamp platform under the supervision of the Instruction Unit.
2. Peer Evaluations shall be coordinated by the Program Chair, ensuring that one peer is nominated by the faculty and another is designated by the Chair. For Chairs, peers

shall be selected from fellow program heads within the same college or related discipline.

3. Classroom Observations shall be conducted using the prescribed tools
 - Observers shall include the Dean, Assistant Dean, Program Chair, or designated peer.
 - Observations must include a pre-conference (for announced observations) and a brief post-conference for developmental feedback.
4. Dean/Assistant Dean Evaluations and Program Chair Evaluations shall be conducted using the prescribed forms, focusing on leadership, professional conduct, and compliance with institutional expectations.
5. Self-Evaluations shall be completed by all faculty and program chairs as a reflective exercise prior to the consolidation of results.

C. Consolidation of Results

1. All component scores shall be summarized using the prescribed OVPAA Summary of Ratings Forms.
2. Program Chairs shall compile and verify all component ratings for their faculty before endorsing them to the Dean.
3. Deans shall review and validate submitted ratings, sign the Summary of Ratings, and forward the completed reports to the OVPAA for final review and documentation.

D. Feedback and Developmental Planning

1. The Program Chair (for faculty) or the Dean (for program chairs) shall conduct performance feedback sessions with each ratee after evaluation results are finalized.
2. The goal of these sessions is to:
 - Communicate results clearly and constructively;
 - Identify strengths and growth areas; and
 - Develop a **Performance Improvement or Professional Development Plan** when necessary.
3. All feedback discussions and development plans shall be documented and retained as part of the faculty or chair's performance file.

E. Accountability and Monitoring

1. The OVPAA shall monitor compliance with the prescribed evaluation procedures and timelines across all colleges.
2. The Instruction Unit shall regularly review the effectiveness of the PES tools and recommend adjustments for improvement based on data trends and stakeholder feedback.
3. Evaluation results shall also inform the design of capacity-building programs and institutional recognitions for exemplary faculty and academic leaders.
